

WE ARE SONA COMSTAR

ENGINEERING MOBILITY BEYOND BOUNDARIES

Sona BLW Precision Forgings Limited (Sona Comstar) is one of the world’s leading mobility technology companies, specialising in highly engineered, mission-critical systems and components for global mobility OEMs. We have established a strong global presence through our manufacturing and assembly facilities, R&D centres, and engineering capability centres.

Our journey began with building strong expertise in engineering advanced components for the automotive sector. Today, we are a leading supplier of driveline solutions for the global auto market and traction motor solutions for the Indian electric vehicle (EV) market, while also expanding our presence in railways through advanced brake systems, couplers, and suspension systems.

Backed by strong capabilities in precision forging, mechanical and electrical systems, radar sensors, and software development, we continue to engineer intelligent, connected, and future-ready mobility solutions.

OUR MISSION OUR VISION

Be leaders in the technology we invest in and give our customers an edge over the rest while designing and building products that will enable the future of mobility.

To become one of the world's most respected and valuable mobility technology companies for our customers, employees, and shareholders.

OUR VALUES

At Sona Comstar, we believe in always doing the right thing, no matter what the cost or whether anyone is looking. Build better and more economical products faster. Thereby adhering to Integrity, Vitality, Frugality, and Agility.
